## Professional Summary

Data Engineer with **4+ years** of experience building **ETL/ELT** pipelines, **API-driven** integrations, analytics layers, and business-facing data products across logistics, legal, retail, and SaaS operations.

My core stack includes **Python**, **SQL**, **BigQuery**, **dbt**, **Power BI**, and relational data modeling, along with **Docker**-based deployments across **GCP**, **AWS**, and **Azure**. I have a strong track record in system integration, process automation, and technical support for business teams.

In recent projects, I reduced up to **20 hours per week** of manual work, replaced about **16 hours per week** of operational ETL, cut logistics costs by **22%**, and accelerated recurring analysis by up to **70%**.

## Technical Skills

**Data Engineering:** SQL, ETL/ELT, BigQuery, dbt, Data Vault 2.0, PostgreSQL, MongoDB, Relational Data Modeling, Analytics Data Modeling, API Integration, Data Quality

**Cloud & Infrastructure:** GCP, AWS (Lambda, S3), Azure, Docker, Cloud Run, Cloud Build, Serverless Pipelines, Git, CI/CD

**Analytics & BI:** Power BI, DAX, Power Query/M, Google Analytics, KPI Dashboards, Dynamic Filters, Hex.app

**Programming & Automation:** Python, REST APIs, Flask, Web Scraping, Playwright, Pandas, OCR, Process Automation

**AI & Data:** OpenAI API, LLM Integration, Prompt Engineering, Document Extraction, Structured Validation, Semantic Search

## Professional Experience

### Linus

Sao Paulo, SP, Brazil | 2026 - Present

#### Data Engineer

Jan 2026 - Present

- I build **ETL/ELT** pipelines that integrate **Shopify**, **Omie**, and **Tiny ERP** data into **BigQuery** with **Python** and **SQL**, improving reliability and analytics availability.
- I modeled analytics layers and business-ready datasets in **BigQuery** with focus on relational design, data quality, and query performance.
- I deploy APIs and automations with **Docker** on **GCP** and support BI deliveries for sales, marketing, and operations through more reliable data workflows.

### Excel Santos (consulting)

Santos, SP, Brazil | 2025 - 2026

#### Data Engineer

Sep 2025 - Apr 2026

- I automated ocean-freight quote extraction with **Python** and **Playwright** and deployed the workflow to **Azure** for continuous cloud execution.
- I built **Power BI** pipelines and dashboards integrated with **SharePoint** and **Salesforce** using **Python**, **SQL**, **DAX**, and **Power Query/M**, improving visibility into commercial and operational KPIs.
- I automated document extraction and validation with **Python** and **OpenAI API**, reducing manual steps and improving review reliability.

### CP Legal Claims

Sao Paulo, SP, Brazil | 2024 - 2025

#### Data Engineer Junior

Dec 2024 - Dec 2025

- I configured **ETL** through the **HubSpot** API with **Python** and **BigQuery**, replacing approximately **16 hours per week** of manual work.
- I structured pipelines with **dbt** and **Data Vault 2.0** to standardize CRM history, improve dataset consistency, and support reusable reporting for business teams.
- I automated Brazilian Official Gazette collection with **AWS Lambda**, **S3**, and **Python** and created **SQL** rules that accelerated legal analysis by up to **70%**.

#### Data Analyst Junior

Mar 2024 - Dec 2024

- I resolved financial data inconsistencies using **SQL** in **BigQuery** and **Python** in **Hex.app**, enabling daily investor-ready datasets.
- I built commercial dashboards in **Power BI** and automated divergence alerts in **HubSpot**, reducing rework by around **15 hours per week**.

## LECEX

Santos, SP, Brazil | 2023 - 2024

### Data Analyst Junior

Jun 2023 - Mar 2024

- I implemented automated freight-data scraping with **Python**, saving **20 hours per week** of manual work.
- I automated data migration from **MySQL** to **PostgreSQL** and website publishing workflows with **Python**, **SQL**, **Docker**, and **PHP**.

### Data Analyst Intern

Jan 2023 - Jun 2023

- I automated marketing reporting through the **Google Analytics API** with **Python**, improving campaign results by **70%**.
- I developed marketing and freight dashboards in **Power BI** with **SQL**-based queries, reducing shipping-carrier costs by **22%**.

## Projects

### Event-Driven Integration API on GCP

- Event-driven integration API built with **Flask**, **Docker**, **Cloud Run**, and **Webhooks** for reliable external-event processing.
- I implemented token validation, dry-run support, structured logs, and an automated build and continuous deployment pipeline.

### CRM Analytics Platform with dbt and Data Vault

- CRM platform built with **dbt**, **SQL**, **Data Vault 2.0**, **HubSpot**, and **Power BI** to standardize historical data and quality.
- I structured analytics layers, quality tests, and automated alerts to reduce operational divergence.

### Enterprise Data Validation Framework

- Validation and reconciliation framework across data sources built with **Python**, **SQL**, **BigQuery**, and **Pandas**.
- I standardized quality rules, audit trail, and observability to reduce inconsistency diagnosis time.

### Legal Data Intelligence Platform

- Legal-data platform with serverless ingestion on **AWS Lambda** and **S3**, parsing in **Python**, and analytics layers in **BigQuery** and **MongoDB**.
- I implemented procedural-event rules with **SQL** to accelerate recurring operations and analytical review.

## Education

- Bachelors Degree in Systems Analysis and Development | Rubens Lara Faculty of Technology (FATEC) | Expected graduation: **06/2026** | Evening program
- Bachelors Degree in Computer Science | Catholic University of Santos (UNISANTOS) | Expected graduation: **06/2026** | Evening program
- MBA in Data Science & Analytics | USP Poli | Planned start: **01/2027**
- Masters degree focused on Applied Neural Networks | Federal University of Sao Paulo (UNIFESP) | Planned start: **01/2027** | Research line in a FAPESP research group focused on model generation through an integrated workflow with Full Waveform Inversion (FWI) for geological CO2 storage target prediction

## Certifications & Achievements

- AWS Academy Cloud Foundations | Amazon Web Services / Credly | Cloud computing fundamentals certification
- Data Science Program | ADA | Complementary education focused on data science fundamentals and applied practice
- Regional SBC Programming Marathon - Team Distinction | Brazilian Computer Society | **2024**
- 3rd Place - Santo Scuderi Programming Marathon | UNISANTA | **2024**
